

8 HOURS
STOP LONG ANIMAL TRANSPORTS

Countless animals are transported on the roads of Europe under unacceptable conditions. They suffer from hunger and thirst, heat and stress. The biggest problem is the length of the transports. Current legislation permits transports over the course of several days and thousands of miles. This has to change! Living animals destined for fattening and slaughter must not be transported for more than eight hours! Our goal is to collect 1,000,000 signatures to finally put an end to the suffering of the animals on the streets of Europe.
